Subject: FW: stakeholder requests for high-priority chemicals
Attachments: stakeholder requests highpriority_112918.docx; Silent Spring Comment.pdf

Updated list. We have received a few more comments since last week. Attaching the Silent Spring one which lists a bunch of chems from the workplan they would like us to look at. Also an interesting comment on the need for a full data set to declare something a low.

Subject: stakeholder requests for high-priority chemicals

Mark,

Alison mentioned that this came up in a meeting yesterday and I wanted to provide you with more information. Attached is a document that lists the chemicals stakeholders requested for high-priority designation before and after the December 2017 meeting (you have seen this list) and then the team just reviewed the comments on the Prioritization white paper and there were a few additional requests which are listed here.
